(54) Title: RUNNING AND TESTING APPLICATIONS

(57) Abstract: A receiver/decoder for testing an application, for example, for an analogue or a digital television system, is disclosed, the receiver/decoder comprising means for exchanging messages with a network, and means for running the application in dependence on a message received from the network. The receiver/decoder may be used for debugging the application. An associated workstation, and an application development tool for editing and testing applications, are also disclosed. Also disclosed is a method of transferring an application from a workstation to a receiver/decoder, and methods of running an application on a receiver/decoder.
